Race Star Industries Announces DragStar Wheel 5-Star Design Offers High Style and Superb Strength

Kearney, Missouri, August 27, 2009—

Race Star Industries is pleased to announce the introduction of its DragStar Wheel. The DragStar design commemorates Race Star Industries' commitment to a true street-strip performance wheel. The DragStar is crafted from 1-Piece Performance Alloy Aluminum creating crisp smooth spoke design. Race Star Industries initial size offering for the DragStar is in popular 15" wheel sizes: 15x3.75, 15x8, 15x10, 15x12, and 15x14 with more diameters, widths, and offsets becoming available in the near future. The DragStar design incorporates a tri-fit bolt-circle application thru tight lug bore dimensional control so each wheel can be offered in 5x4.5 and 5x4.75 bolt-circle applications without compromising wheel design or ride quality. Race Star Industries engineer the DragStar wheel to truly fit the popular LS1 F-Body and S197 Mustang GT applications with no brake caliper modifications. The Drag Star is only offered in a beautifully polished show quality finish. The 15x3.75 DragStar front runner weighs only 10.5lbs. And exceeds FEA US testing standards and specifications! The DragStar is an IHRA and NHRA approved wheel for competition. For more information on where to find your nearest DragStar Wheel Dealer or inquiries on becoming a DragStar wheel dealer please contact Race Star Industries at 888-492-9394. Race Star Industries' customer pledge is to offer light weight, cutting edge design wheels at an affordable price with true out of the box direct fit applications!

Race Star Industries is a manufacturer of performance alloy wheels for automobiles and light trucks, and a variety of racing vehicles. The company is located in Kearney, Missouri, and sells its products throughout the United States and in many foreign countries.
